

Jessup Watson Thomas was  
burried in NE Area of Heber  
City, Cemetery.

Very little is known about  
the monument to him in  
Lake Creek. One Fall 1989  
afternoon, Dr RR Green & Danny  
Tucker spent 3 hrs. looking for  
the Lake Creek Monument but  
could not find it.

## Five new towers will help re-establish survey network

25 Sep 1989

By IDA DONALDSON  
Herald Correspondent

MANTI — The Sanpete County Commissioners heard a report from Ernest Rowley of Sunrise Engineering that five survey towers are in the process of being placed in Sanpete County which will aid in the preservation and re-establishment of the official United States land survey network and the Utah State Plane Coordinate System.

Plaques on the towers will give this information along with an explanation: "The use of this tower should provide for less expensive and more accurate land surveys for surveyors, property owners, and counties."

The five metal towers have already been fabricated. They are built in pyramid form, are 10 feet high at the base and 15 feet tall,

and are placed on concrete, deep-seated bases.

The five towers will be placed on high points in Sanpete County. One is already in place on Baldy Mountain west of Ephraim. It is located on private land.

The second tower will be on Musinia, the third above Mt. Pleasant near the Skyline Drive, the fourth on Horseshoe Mtn. and the fifth on the south side of Salt Creek.

The second tower will be installed this fall and the other three next year.

Some of the towers will be delivered to the sites by helicopter and some of the bases will be placed in solid rock.

The commission has included \$8,500 in this year's budget toward the cost of the project.
